AS Relay™ 7000/8000 inserter

# High-volume mail demands high-volume accuracy.

Get the fast, reliable mail assembly your business needs, mailing after mailing.

Whether it's sending out monthly bills to existing customers or direct mail to build your business, your mail is critical to your success. And getting it right isn't just important. It's everything. Because these days a single mistake can undo months of communications.

The AS Relay 7000 and 8000 inserters are specifically designed to provide custom, reliable processing of up to 200,000 pieces a month at high speed. So you can be confident you're not just sending your mail out on time, but you're sending the right information to the right customer.

## The same innovative document-integrity technology used by the world's largest mailers

When you consider that millions of bills, statements and other sensitive documents are sent to customers every day, you realise why it's so important for the mail to receive the highest privacy safeguards possible. Now you can give your business the advantage of the very same customer data privacy protection used by global companies.

### Combine flexibility and accuracy

The AS Relay 7000/8000 inserters offer the options you need to meet the demands of an ever-more-competitive marketplace and the increased pressure of strict compliance regulations. Among them are 2D scanning and file-based processing, which ensure that your most important mail reaches the right customer on time every time.

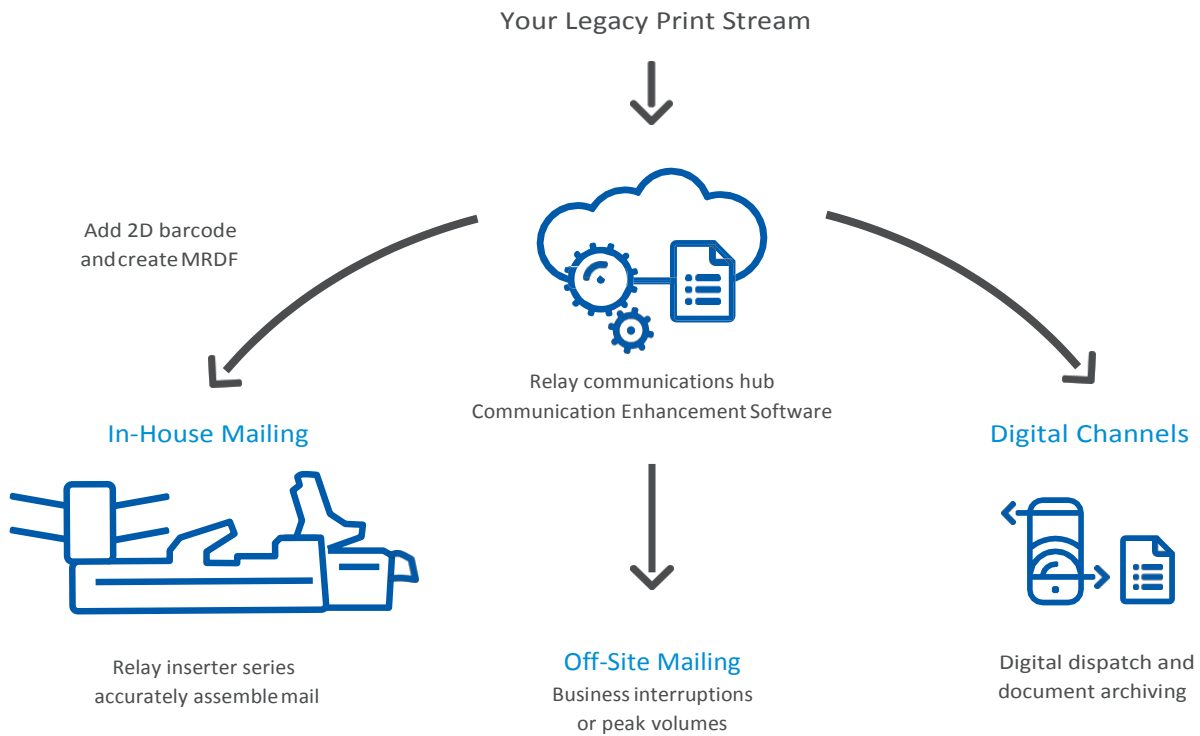

### Take on even the most complex mailings

You shouldn't have to tailor your mail programs to the limitations of your equipment. The AS Relay 7000/8000 inserters provide the flexibility to insert pages into letter-sized envelopes or mailers in the same mail run without stopping the machine. Even better, set-up is easy and fast.

Validate every page of a mailing against the intended mail file automatically with file-based processing.

# Relay™ multi-channel communications suite

## Protecting private customer data is easier than you think

When it comes to your customers' personal information, "good enough" is never good enough. Fortunately, adding the security of 2D barcodes to documents and file-based processing to your workflow is simple with the Relay communications hub.

Using existing print streams, this web-based software allows you to add 2D barcodes and create the Mail Run Data File (MRDF) for file-based processing, without redesigning your documents.

## Keep your mail moving without the worry

By working together, the AS Relay 7000/8000 inserters and the Relay communications hub provide you with best-in-class data privacy and workflow safeguards. In the event of an unexpected business interruption

or production capacity overflow, the Relay communications hub dynamically moves your work off-site so your mail doesn't stop.

## The AS Relay™ 7000 and 8000 inserters Side-by-Side Comparison

| Feature                             | Relay 7000  | Relay 8000  |
|-------------------------------------|---|---|
| Throughput                          | 5,400 per hour  | 5,400 per hour  |
| Monthly Capacity                    | 120,000   | 200,000   |
| Fold Options                        | C, Z, Half, Double, No Fold                                     | C, Z, Half, Double, No Fold                                     |
| Integrity Options                   | OMR, 1D, 2D, File Based   | OMR, 1D, 2D, File Based   |
| Media Sizes                         | Min: 127mm(W) x 135mm(H)<br>Max: 250mm(W) x 356mm(H)            | Min: 127mm(W) x 135mm(H)<br>Max: 250mm(W) x 356mm(H)            |
| Standard Sheet Feeder Capacity      | 350 Sheets  | 350 Sheets  |
| Inserter Feeder Capacity            | 350 Inserts   | 350 Inserts   |
| High-Capacity Sheet Feeder Capacity | 2,000 Sheets  | 2,000 Sheets  |
| Letter Envelope Capacity            | 500 Envelopes   | 500 Envelopes   |
| Max. Number of Feeders              | 8 (4 High-Capacity Sheet Feeders<br>+ 4 Sheet/Inserter Feeders) | 8 (4 High-Capacity Sheet Feeders<br>+ 4 Sheet/Inserter Feeders) |
